

SINGAPORE INTERNATIONAL WATER WEEK 2010 RIVER BASIN & DELTA MANAGEMENT WORKSHOP

Ms AMEENA ALI KULAIB AL TENAIJI

WATER DEPARTMENT MANAGER, MASDAR CITY.

United Arab Emirates

Ameena earned a Diploma in Electrical Supply Management from the International Center for Organizational Management. She holds an MSc in Environmental Earth Resources Management from South Carolina University, USA, and a BA in Geology from the Faculty of Science, Kuwait University. Ameena is a Member of Chartered Institution of Water & Environmental Management (CIWEM) and Chartered Water & Environmental Manager and was nominated as a CIWEM Trustee Board Member. She is a member of the International Desalination Association.

Ameena Ali Kulaib Al Tenaiji is the Water Department Manager at Masdar City, leading the team tasked with finding and implementing a sustainable water solution for the city. This includes developing Masdar City's water and wastewater strategy and managing all projects related to water, wastewater and storm water, from design to construction to commissioning.

A 22-year water management professional, Ameena has expertise in running sustainable water management systems, sustainable plant and networks design, optimisation of renewable energy sources, water and wastewater regulatory compliance issues, bio-solids and residual management.

SINGAPORE INTERNATIONAL WATER WEEK 2010 RIVER BASIN & DELTA MANAGEMENT WORKSHOP

Before joining Masdar, Ameena spent eight years with the Abu Dhabi Transmission & Despatch Company (TRANSCO), in roles of increasing responsibility, most recently as Asset Information & Standard Manager (Power & Water). In that role she was responsible for developing the asset information strategy framework, as well as managing and maintaining TRANSCO databases, and establishing a framework to manage and maintain the asset standard specification and policy.

Prior to that, she was Head of the Water Asset Management Section for Abu Dhabi Distribution Company (ADDC), where her roles included integrating system planning with TRANSCO and the generation & desalination company, in light of new demand.

She also worked more than eight years with the Ministry of Electricity & Water in Dubai, serving in three successive roles: Head of Groundwater Section, Head of Desalination Section and Head of Water Studies.
