Water Leaders Summit
Be inspired by insights and success stories from water experts across the globe
Attended by over 500 leaders from governments, utilities, international organisations, academia

Young Water Leaders Summit
Convergence of young water professionals to become effective catalysts and leaders for a sustainable future

Lee Kuan Yew Water Prize
At the Water Prize lecture, the laureate will share game-changing water technologies, policies and programmes in real-world applications

Water Convention
Get updated on strategy, innovation and ready solutions through workshops, plenaries, technical sessions and poster presentations

TechXchange
Accelerate commercialisation and witness the birth of new water technologies with innovators, partners, buyers and investors through business pitching sessions

Innovation Pavilion
A showcase of game-changing innovative technologies across the entire water value chain

Site Visits
Gain a deeper understanding of Singapore’s urban water landscapes through technical visits

Water Expo @City Solutions Singapore
Discover state-of-the-art solutions, technologies, services and products from over 1,000 participating companies

Business Forums
Uncover emerging trends and business opportunities in the world’s most active regions for water projects

Connect @SIWW
SIWW’s exclusive e-business matching concierge for delegates

Organised by: Held in conjunction with:
SNAPSHOT OF THE SINGAPORE INTERNATIONAL WATER WEEK (SIWW) SPOTLIGHT 2019

Over 260 local and international water leaders attended the SIWW Spotlight held on 6-7 June 2019. For the first time, the conversations were focused on industrial water solutions to encourage more business to reduce, replace and reclaim water by tapping technologies that are readily available.

Held in between the main SIWW editions, The SIWW Spotlight series are exclusive, by-invitation events to continue ongoing dialogues from SIWW, and foster exchanges on pressing global water challenges.

“Singapore has really helped to move the needle on municipal water treatment for a long time, and what they have done very nicely in this conference is to look at industrial water, which is part of everybody’s business. The sessions were thought-provoking, and had deep insights and nice examples of what it takes to help industries become better stewards of their own water.

Dr Lukas Loeffler
President of Water and Wastewater at Schneider Electric and delegate at SIWW Spotlight 2019.

The reason I come to SIWW is to know what are some of the best practices in the world and gain practical observation, experience and relationships on how to get there. Every time I come to SIWW, I learn things I didn’t know and learn it from some of the best in the world.

Mr George Hawkins
Founder and President, Moonshot LLC and Moonshot Partners and delegate at SIWW Spotlight 2019.

The recycling rate in large industries is currently around 20% and there is certainly room to increase this number through greater adoption of technologies. Technologies are available and have been implemented in sectors like semiconductor, petrochemicals and others. We have been working closely with large water users to manage their water demand providing technical and funding support for industrial water solutions and water stewardship projects.

Mr Ng Joo Hee
Chief Executive of PUB, Singapore’s National Water Agency.

MORE THAN 260 DELEGATES FROM 19 COUNTRIES

17 INTERNATIONAL AND LOCAL SPEAKERS

3 SITE VISITS to witness the implementation of innovative water solutions in industrial projects

8 POSTER PANELS AND CASE STUDIES on successful water recycling projects by companies
