

Business Forums 2016
Industrial Water Solutions Forum

About

Major industries such as food and beverage, petrochemicals, power generation and electronics manufacturing all face water-related challenges. Whether it is scarce water resources, tightening of water quality and discharge standards, or sustainability reporting, such challenges also bring with them opportunities. Valued at US\$52.8 billion by the Global Water Intelligence, the industrial water solutions market is one of the fastest growing segments in the global water industry, with companies seeking viable solutions for environmentally sustainable business operations. This one-day Forum on 13 July 2016 will draw high-level, cross-sector speakers to discuss the role of water as part of the wider sustainability agenda, and share best practices in innovative water management, and partnership models to address these unique industrial demands.

Programme

Time	
9 – 9:15 am	<p>Introduction and Keynote Address by Mr Masagos Zulkifli, Minister for the Environment and Water Resources, Singapore Overview of the Singapore water industry and the importance of industries in the water value chain.</p>

Water and the Bottom Line

For some of the largest companies around the world, water has become an increased expense and one they can no longer take for granted. This session will address how industrial water end users and solution providers are coming together to optimise existing infrastructure and assets to increase production and lower costs.

Chairperson: Dr Glen Daigger, President, One Water Solutions; Professor of Engineering Practice, Department of Environmental Engineering, University of Michigan

Panel Members:

- Mr Alan Chan, Asia Pacific Commercial Director, Dow Water & Process Solutions
- Mr Ashish Aneja, Advanced Technologies Leader, GE Water & Process Technologies USA
- Mr Peter Nicol, President, Water Business Group, CH2M
- Mr Stephane Boyer, Managing Director, SUEZ Industrial Solutions

1:30 – 3 pm

3 – 3:15pm
