

Press Release

NEW \$40 MILLION INDUSTRIAL WASTEWATER TREATMENT COMPLEX AT TUAS TO SUPPORT SINGAPORE'S GROWING CHEMICAL CLUSTER

Singapore, 9 July 2018 – Supporting the growth of Singapore's high-value added growing chemical cluster, NSL OilChem Waste Management is building a new \$40 million Industrial Wastewater Treatment Complex that is designed to treat a wide spectrum of industrial wastewater generated by petrochemicals, pharmaceutical, and manufacturing industries. This new complex is scheduled to commence operation by end 2018.

“With a focused research and development team and a state-of-art laboratory, NSL OilChem Waste Management will be able to provide innovative solutions to treat a variety of challenging industrial wastewater in the new facility to comply with the high effluent standards of the local authorities.

We also work closely with Nanyang Environmental and Water Resources Institute (NEWRI) at Nanyang Technological University, Singapore, and other academic institutions to constantly update our technical know-how in anticipation of our customers' requirements. Our customers can be assured that their compliance is our responsibility.” said Dr Low Chin Nam, a Director of NSL OilChem Waste Management.

Find out more at the Singapore International Water Week (Booth B2-P08) held at Sands Expo and Convention Centre, Marina Bay Sands from 9 to 11 July.

About NSL OilChem Waste Management

Established in 1997, we specialize in oil-and-chemical waste management and the distribution and supply of diesel, fuel oil, marine bunkers, lubricants and fuel management services. A leading integrated waste management company, our business activities contribute to environmental sustainability.

Through harnessing technology as an enabler to enhance our customer experience and operating efficiency, we offer prompt, reliable and safe collection services with our fleet of specialised vehicles and barges equipped with GPS tracking devices.

At NSL OilChem Waste Management, we adopt best business and environmental practices that offer waste management solutions for our customers, while protecting the environment.

NSL OilChem Waste Management is the environmental arm of NSL Ltd, a leading industrial group in Asia Pacific listed on Singapore Exchange.
