Hexagon PPM Shares Knowledge to Advance Project Delivery and Performance

Explore how key industries in Singapore achieve accurate, faster design collaboration and quicker revision response for projects

SINGAPORE, July 8, 2018 – Hexagon’s PPM division will showcase its intelligent, AutoCAD®- and BricsCAD®-based plant design solution, CADWorx®, at a series of knowledge-sharing events in Singapore and Jakarta this July. Starting with Singapore International Water Week (SIWW) and followed by seminars in Singapore and Jakarta, industry professionals will explore how having faster, more accurate information within an intelligent integrated system can help key industries deliver projects on time and on budget.

SIWW, scheduled for 8-12 July at Marina Bay Sands, provides a global platform to share and co-create innovative water solutions. To support this goal, Hexagon PPM solution experts have authored a new whitepaper specifically for SIWW attendees, *Solving Water Industry Plant Design Challenges on a Global Level*. The paper highlights the importance of implementing an intelligent design platform that enables bi-directional links of information between design modules and analytic programs to achieve faster, more accurate, on-time project delivery with less rework and man hours. It discusses how Singapore is an example of innovation and leadership in this space. Copies of the white paper will be made available to visitors of the Hexagon PPM booth L1-Q13.

The following week, Hexagon PPM will host its HxGN LOCAL CAU Express 2018. This exclusive event focused on CADWorx and Analysis solutions will be held on 16 July at the Hilton Singapore and on 18 July at the Shangri-La Hotel, Jakarta. The sessions aim to provide piping, equipment, and instrumentation engineers and designers with an in-depth knowledge to achieving project accuracy, efficiency and faster revision response time.

“By continuously advancing our CADWorx solutions, we provide our clients the most complete tools for efficient plant design and help them achieve their goals by addressing unique challenges faced in every project,” said Rick Allen, president of CADWorx & Analysis Solutions at Hexagon PPM.

###

About Hexagon’s PPM Division

Hexagon’s [PPM](#) division is the world’s leading provider of asset life cycle solutions for design, construction, and operation of industrial facilities. By transforming unstructured information into a smart digital asset, our clients are empowered to visualize, build, and manage structures and facilities of all complexities, ensuring safe and efficient operation throughout the entire life cycle.

Hexagon is a global leader in digital solutions that create Autonomous Connected Ecosystems (ACE). Hexagon (Nasdaq Stockholm: HEXA B) has approximately 18,000 employees in 50 countries and net sales of approximately 3.5bn EUR. Learn more at hexagon.com and follow us [@HexagonAB](#).

About CADWorx & Analysis Solutions

CADWorx & Analysis Solutions is part of Hexagon PPM. It develops and supports the following products: CADWorx[®], for plant design; CAESAR II[®], for pipe stress analysis; PV Elite[®], for pressure vessel analysis; and GT STRUDL[®], for structural analysis.

For more information on CADWorx, visit <https://hexagonppm.com/products/3d-product-family/cadworx>
For information about CAESAR II and other analysis products, visit <https://hexagonppm.com/products/analysis-product-family>.
